## Summary

---

Whilst studying veterinary medicine, I was introduced to programming by a close friend. I have always been curious about software development, but after taking a course and creating a Snake game from scratch, I was totally hooked. I found myself doing something I really loved.

Since being introduced to programming, I have taken multiple courses to improve my skills and get better every day and have created a portfolio of applications.

## Skills

---

- |              |         |
|--------------|---------|
| ▪ JavaScript | ▪ HTML5 |
| ▪ React      | ▪ CSS3  |
| ▪ Node.js    | ▪ Git   |

## Projects

---

### Portfolio

→ I created my own portfolio using React.

### Streaming Video

→ I created a Streaming Video App using react. This application streams your own streaming using a RTMP server, and allows you to create, edit or delete your streams using Google Auth.

### Natural Language Processing App

→ I developed a news article sentimental analysis web application using a Natural Language Processing API. This project was made using JavaScript, NodeJS and Webpack.

### Travel App

→ I developed a travel application using JavaScript, NodeJS and Webpack. This application uses the information incoming from the user to displays some information about the trip.

### Weather Journal App

→ I created a Weather Journal App that allows user to get the actual weather from a place using the zip code from this place.

### Snake Game

→ This is my very first project. I created a Snake game from scratch using Vanilla JavaScript.

## Education

---

### **UDACITY**

Online Front-End Web Developer Nanodegree – *February 2020.*

#### **COURSES TAKEN**

- Modern React with Redux.
- Git Complete.
- Intro to Node.js and Express.
- Development and Publication of Web Applications.
